

*The non-covalent synthesis of functional
supramolecular systems.*

Prof. E. W. Meijer

Eindhoven University of Technology, The Netherlands.

Friday 26th March, 2010. ICIQ Auditorium, 12 p.m.

EXPERIENCE

- 1977-1982** State University Groningen (University assistant of Prof. H. Wynberg)
- 1982-1989** Philips Research Laboratories Eindhoven (Research scientist Molecular Materials)
- 1989-1992** DSM Research Geleen (Head of department "New Materials")
- Since 1991** Eindhoven University of Technology (Full professor of Organic Chemistry)
- Since 1995** Radboud University Nijmegen (Adjunct professor of Macromolecular Chemistry)
- Since 2004** Eindhoven University of Technology (Distinguished University Professor of Molecular Sciences)
- Since 2006** University of California, Santa Barbara (Distinguished Visiting Professor)

RESEARCH INTERESTS

Non-covalent synthesis of complex molecular systems
Dendrimers and novel macromolecular architectures
Supramolecular chemistry and self-assembled functional materials
Supramolecular chemical biology
Stereochemistry and chirality
